Offer

Metal and Machinery Construction and Construction Materials

The production in SeanTech Bosnia is organized with advanced CNC machinery; equipment and spare parts are designed and constructed based on specific technical requirements of the customer. In addition to the construction of new spare parts, SeanTech Bosnia pays particular attention to the repair of large spare parts, thus providing considerable savings to its customers. In the rich scale products, SeanTech Bosnia wants to emphasize the production of spur gear with internal and external up to 2000 mm dia. conical teeth made by Klingelnberg method, rack gears, worm gears, with relevant heat treatments department, chains, axles and shafts, coupling, and other spare parts and mechanical structures.

Cooperation Offered

1. Manufacturing agreement
