Tehnika D.O.O. - Gornji Vakuf - Uskoplje is the largest industrial producer of woodworking machines in Bosnia and Herzegovina.

The company was founded in 1996, and since its inception, it has been orientated towards its end users / customers, striving to enrich its production range every year with new

products tailored to the needs of users.

Through its years of work and constant development, the company has grown into a wellknown manufacturer of woodworking machinery, a machine specially designed for the order of the customer, hydraulic, hydraulic systems, pneumatic, pneumatic systems, hydraulic lifts and platforms, metal constructions, serial production and other services in the field of machining.

We are equipped with modern machines and appliances to help meet most of our customer requirements, and in the next period we plan to raise the degree of automation.

By constantly raising the quality of our products and approaching the European level, the products of our production have the CE mark. Also, the quality system of Tehnika D.O.O. is fully in line with national and international legal regulations and standards.

Confirmation of this is that we have ISO 9001: 2015 standard for quality management of the production process within the company.

Our goal is to grow and open new markets in countries where we are not present to bring all the benefits to our customers from our work.

Poslovna logika Tehnika D.O.O. is to provide users with quality, efficient, reliable products as well as professional access to all things and jobs.
